

## 1 Supported Web Browsers

**Minefield** Firefox [Gecko] 4.013pre

**Chromium** Chrome [Webkit] 10.0.629.0 build 70502

**Safari** Apple [Webkit] 5.0.3 (7533.19.4)

**Opera** Opera v11.02 build 1190

## 2 Identified differences

1. FIREFOX does not provide SVG text selection, copy, search...(we have been asking this for summer 2010 !)
2. OPERA does not support FormData objects (XMLHttpRequest v2)
3. SAFARI does not allow PDF drop (HTML5) on diagram nodes (to investigate !)
4. SAFARI does not render shape shadow (strange !)
5. CHROMIUM render bad graphic artefact on shadow (bug posted...ref)
6. Only OPERA accept SVG favicon...we use a temporary png.
7. FIREFOX does not support SVG fonts, we use otf
8. FIREFOX has some rendering bug for Ace editor
